Bank Loan Application Form Data Modelling and Form Design in Zoho Creator

Bank Loan Application Form — Basic Fields Use Case

Submitted by

Karpaga Sundari V

Register Number: 241401037

Aim

To design a data model and build a business application form in Zoho Creator for managing bank loan applications, and to demonstrate the creation of all thirteen Basic Field types, the configuration of field-level validations, and the generation of report data from submitted records.

Procedure

1. Log in to Zoho Creator and create a new application titled “Loan Application & Pre-Screening Management”.
2. Create the form “Loan_Application_Form” and add the Personal Details fields: Applicant Name (Name field), Date of Birth (Date field), and PAN Number (Single Line).
3. Add the Contact Details fields: Email Address (Email field), Contact Number (Phone field), and Residential Address (Address field).
4. Add the Income & Employment Details fields: Employment Type (Radio), Monthly Income (Number field), and Existing Liabilities (Multi Select).
5. Add the Loan Details & Consent fields: Loan Type (Drop Down), Purpose of Loan (Multi Line), Preferred Callback Time (Time field), and consent for a credit bureau check (Checkbox).
6. Configure field properties in the form builder, such as field link names, choice values for radio/multi-select fields, mandatory validation, email and phone format validation, numeric range restriction on Monthly Income, and an age restriction on Date of Birth.
7. Preview and fill out the Loan_Application_Form with sample applicant data, and submit the form.
8. View the submitted record in the Loan_Application_Report to verify that the data has been captured and stored correctly.

Data Model

The application uses a Loan_Application_Form built entirely from Zoho Creator's Basic Fields, mapped to the fields a bank would need to pre-screen a loan enquiry. The table below maps every Basic Field from the Form Builder palette to its role in the form, and Fig. 1 shows the extended entity-relationship diagram: the Applicant links to a Loan_Application, which in turn connects to supporting entities for Documents, Loan_Approval, Payment_Schedule, Employment_Details, and the Loan_Type catalogue, while a Co-Applicant and Credit_History table extend applicant details for joint and risk-assessed applications.

Basic Field	Form Field Name	Purpose	Sample Value
Name	Applicant_Name	Captures the full name of the applicant using First/Last name sub-fields	Suresh Raghavan
Email	Email_Address	Captures a validated email address for sending application status updates	suresh.raghavan@example.com
Address	Residential_Address	Captures the applicant's full residential address with city, state, and pincode	18, Lake View Road, Trichy, TN, 620001
Phone	Contact_Number	Captures a validated mobile number for the bank to call and verify details	+91 94430 22110
Single Line	PAN_Number	Captures a short free-text entry for the	ABCDE1234F

Basic Field	Form Field Name	Purpose	Sample Value
		applicant's PAN or employer name	
Multi Line	Purpose_Of_Loan	Captures free-text description of the intended use of the loan amount	Funds required for home renovation and furniture purchase.
Number	Monthly_Income	Captures a numeric value with validation for the applicant's gross monthly income	55000
Date	Date_Of_Birth	Captures the applicant's date of birth using a date picker, used for age and eligibility checks	22-Jan-1990
Time	Preferred_Callback_Time	Captures the applicant's preferred time slot for a callback from the loan officer	5:00 PM
Drop Down	Loan_Type	Presents a single-select list of loan products offered by the bank	Home Loan
Radio	Employment_Type	Captures a single mandatory selection among mutually exclusive employment categories	Salaried
Multi Select	Existing_Liabilities	Allows selection of one or more existing loans or financial commitments held by the applicant	Car Loan, Credit Card Dues
Checkbox	Consent_For_Credit_Check	Captures the applicant's consent for the bank to perform a credit bureau check	Checked (Agreed)

BANK LOAN APPLICATION FORM – DATA MODEL DIAGRAM

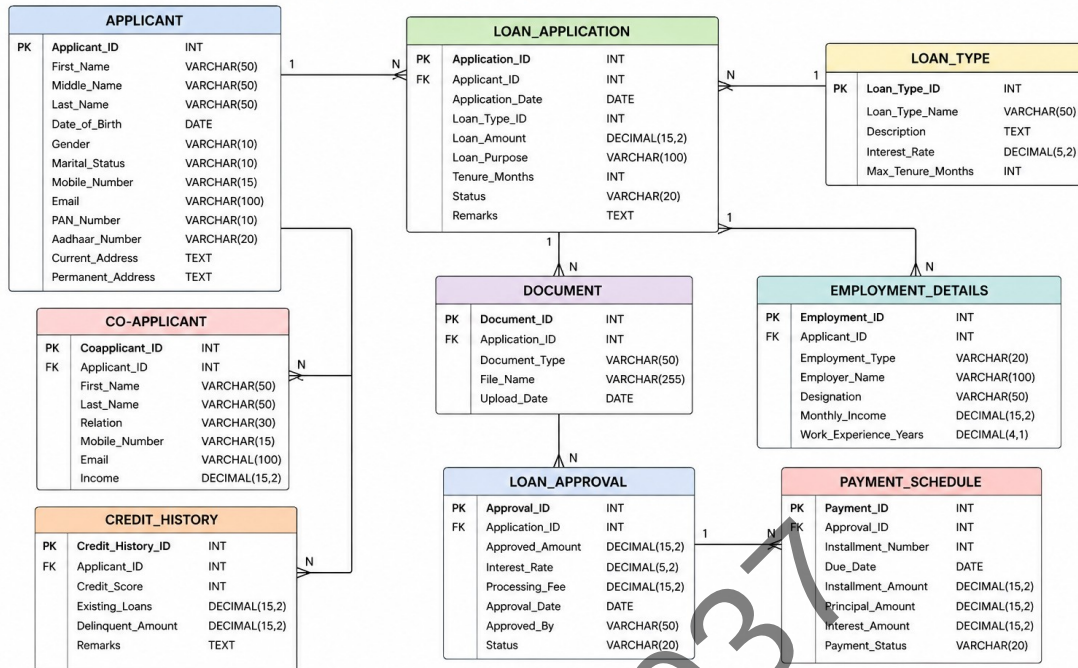

Fig. 1 — Data model diagram for the Bank Loan Application Form

Explanation of Screenshots

The following screenshots illustrate the complete workflow: the live Loan_Application_Form as seen by an applicant, and the output data captured after submission.

1. The Form

The live form below shows the Loan_Application_Form built with all thirteen Basic Fields: Applicant Name, PAN Number, Email Address, Contact Number, Residential Address, Date of Birth, Preferred Callback Time, Employment Type (Radio), Monthly Income, and Existing Liabilities (Multi Select).

Fig. 2 — Loan_Application_Form: live preview with all Basic Fields

2. Output Data

After the form is submitted, the record appears in the Loan_Application_Report, confirming that the data has been stored correctly. The report below displays the submitted record, including Applicant Name, PAN Number, Email Address, Contact Number, Residential Address, Date of Birth, and Preferred Callback Time.

Applicant Name	PAN Number	Email Address	Contact Number	Residential Address	Date Of Birth	Preferred Callback Time

Result

A Loan_Application_Form was successfully designed and built in Zoho Creator using all thirteen Basic Fields available in the Form Builder. The form was structured into four logical sections covering personal, contact, income/employment, and loan details, with appropriate field-level validations applied. The form was tested by submitting sample applicant data, and the submitted record was verified in the Loan_Application_Report, thereby demonstrating a working business application.
